

GOVERNMENT SERVICES

Strengthening each component of your organization.

i need to know my organization is prepared to address today's challenges and meet new ones well into the future.

Government organizations across the United States grapple with strict regulatory compliance issues, increased emphasis on transparency and accountability, and working with limited organizational resources. Delivering quality services while balancing growing expenditures against shrinking funding is top of mind for every leader in a publicly funded organization.

To address these continuing challenges and to anticipate future requirements, your organization will need audit and consulting expertise focused on government organizations.

Wipfli has a dedicated practice group with experts who work solely for the government sector. Our nonprofit and government practice group works with organizations at the local, state, and national levels.

Proudly serving:

- Cities, villages, and townships**
- School districts**
- Counties**
- Housing authorities**
- Fire protection districts**
- Utility districts**
- Library districts**
- Community college districts**
- State and federal agencies**
- Building commissions**
- Park districts**

FIERCELY FOCUSED >

WIPFLI_{LP}
CPAs and Consultants

i depend on experts to ensure my audit meets all regulatory requirements.

You can rest knowing your audit meets the highest quality standards. Wipfli's government audits consistently follow Governmental Auditing Standards and the Single Audit Act.

Our services include SEC and regulatory filings, financial statement audits, single audits, program-specific audits, financial statement reviews and compilations, employee benefit plan audits, and agreed-upon procedures.

i want to work alongside professionals with proven experience who understand the issues across my entire organization.

Our government consultants are ready to work with you to solve urgent needs and collaborate with you on long-term planning. We can address your most critical business issues including strategic alignment, process improvement, organizational development, technology integration, software development, human resources, and risk management. Our multidisciplinary approach addresses and integrates financial, process, people, technology, and customer considerations in all of our recommendations.

Wipfli's information technology consultants work with you in all areas of planning, selecting, and applying appropriate technology. Following a thorough analysis of your business, we match specific technology tools with your immediate needs and long-term goals.

In addition, our human resource consultants can help you effectively manage your HR functions through sound planning and management practices. Whether you're considering an internal or outsourced HR function, Wipfli can meet your needs with forward-thinking business consultants who come to you with years of hands-on experience.
