connectors

Seamless integration makes technology all the more valuable

Technology takes a lot of the manual work burden off your employees' shoulders, allowing them to focus on the more strategic parts of their role. For technology tools to work as efficiently as possible, they need to be integrated with each other.

SAP Concur is one solution that adds a lot of value to an organization. However, organizations that use Concur Invoice or Concur Expense need to get data into their enterprise resource planning (ERP) tool — but the basic extractor exports hundreds of columns of data that then need to be manually parsed and formatted so it can be uploaded into an ERP solution. Not very efficient, is it?

Yet it's a problem easily solved! Wipfli has developed two connectors to provide a secure, seamless connection between Concur Invoice and Concur Expense and different ERP solutions. Our connectors not only save you valuable time but also eliminate the chance of manual errors that come from downloading, manipulating and reuploading data between two platforms.

Bridging the gap to meet your needs

As an experienced partner in helping organizations implement Concur Invoice, Concur Expense, Sage Intacct, NetSuite and Microsoft's large product suite, Wipfli saw a clear need for the connectors. Our deep knowledge of ERP technology solutions, combined with our development capabilities, paved the way for ExpenseConnect and InvoiceConnect.

These two connectors are available for Sage Intacct, NetSuite and Microsoft Dynamics GP, SL, AX and Dynamics 365 for Finance and Operations. Learn more on the back page!

Wipfli's connectors provide a **secure, seamless connection** between Concur Invoice or Concur Expense and your ERP solution.

WIPFLI

Technology should always make your life easier

Wipfli is here to make sure it does. Here's how ExpenseConnect and InvoiceConnect bridge the gap between multiple technology solutions:

ExpenseConnect for SAP Concur

- Build on a flexible data-mapping backbone, ExpenseConnect allows you to integrate expense reports from Concur Expense into your ERP.
- This seamless integration means you don't have to download, manipulate and reupload data into different systems.
- ExpenseConnect is built into your ERP's environment, so you don't have to switch between applications to transfer data. You can continue working in your ERP.
- The connector is prepackaged and cloud-to-cloud, which makes it easy to use and helps ensure a fast, real-time stream of data into your ERP's different modules.

InvoiceConnect for SAP Concur

- InvoiceConnect creates a secure, automated integration between Concur Invoice and your ERP to complete the entire invoice workflow.
- A cloud-based connector, it keeps invoices, payments and vendor information synchronized between systems and fully streamlines your invoice processing. It automatically pulls approved invoice from Concur Invoice into your ERP.
- The synchronization between systems eliminates the need to manually download data extract files.
- Overall, InvoiceConnect gives you enhanced visibility, complete control and minimal hassle.

ExpenseConnect and InvoiceConnect are available for a range of ERPs:

- Sage Intacct
- Oracle NetSuite
- Microsoft Dynamics SL
- Microsoft Dynamics GP
- Microsoft Dynamics AX
- Microsoft Dynamics 365 for Finance and Operations
- Microsoft Dynamics 365 Business Central

Let's get started.
