Work with Wipfli to build a program that meets your needs

Ensuring the security of your information has never been more critical than it is today. As your organization works to comply with ever-evolving security regulations, look to Wipfli for assistance and assurance.

How protected is your organization?

Threats to healthcare organizations are everywhere.

With the adoption of electronic health records and health information exchanges, the growing threat of medical identity theft and the increased emphasis on individual privacy, you need reliable security controls in place. You also need to comply with multiple requirements on several fronts — requirements that keep changing.

But there is good news.

The Health Information Trust Alliance Common Security Framework (HITRUST CSF) is the healthcare industry's most widely adopted security framework. You can apply the latest, recognized standards to your security program, while resting assured that you're taking the most commonly accepted approach to regulatory compliance and risk management.

As an Authorized External Assessor, Wipfli is uniquely qualified to help you align and assess your security program with the requirements you must meet. The HITRUST CSF's scalability allows us to take the size and complexity of your organization into consideration while assessing your information security program.

Our team can help identify and address gaps, and complete your validated assessment for HITRUST certification.

WIPFLI

Core HITRUST solutions

HITRUST gap assessment

Together, we define the scope of the HITRUST assessment, identify effective controls to meet each requirement and provide tailored recommendations for addressing gaps.

HITRUST validated assessment

Help ensure your success in achieving HITRUST certification. Our independent testing is balanced with a collaborative approach to complete the project efficiently and with accurate testing results, maximizing your investment in time and money.

Interim assessment

Let our team help you breeze through your mid-term interim assessment to maintain your two-year HITRUST certification.

Additional solutions to improve your security confidence:

Gap remediation assistance

Stay on track for certification by tracking remediation progress, gaining answers to your HITRUST-related questions and acquiring recommended evidence needed for the validated assessment.

Validated assessment coordination

Lessen your burden during the validated assessment process with our help uploading information and documentation into your assessment. We also help coordinate the evidence collection process with your team, helping ensure you have the appropriate information to support your assessment results.

Policies and procedures

Jumpstart your readiness efforts by using our policy and procedure template library. We also help customize templates to meet your needs.

Cybersecurity testing

Security is a moving target, with new risks, threats and vulnerabilities surfacing daily. Wipfli brings a profound understanding of the cybersecurity landscape, along with a comprehensive suite of cybersecurity testing services designed to examine the effectiveness of your controls, as well as identify vulnerabilities and deficiencies that could put your organization at risk.

Security training and awareness

Using an industry-leading platform, we help you set up and manage your security training and awareness program to help minimize the human risk of data compromise. The platform provides world-class training videos and awareness materials, and it tests your staff's comprehension of security threats and safeguards.

Third-party risk management

Your vendors pose a significant security risk. Evaluate and manage that risk by leveraging our thorough risk management program services.

Incident response services

It is not a question of "if" but rather "when" a security incident will occur. We will help you develop effective plans to respond to incidents that could severely impact your organization. We also help train and exercise your team so they are ready if an incident occurs.

Business continuity and disaster recovery planning and testing

Disasters happen when you least expect. Tornadoes, fires, earthquakes, floods and other threats can severely impact your business operations. We will help you develop effective plans and train your team to respond to disaster threats that could severely impact your organization.

Let's get started

Leverage Wipfli's extensive HITRUST CSF experience and knowledge.
