

CYBERSECURITY SOLUTIONS

For Health Care

In 2018 alone, 15 million patient records were breached.¹

Let's face it, health care is ground zero for cyber and information security threats. Even in an ever-increasing landscape of regulatory and statutory requirements, hacking, phishing and insider threats continue to plague the health care industry. All too often, health care security officers lack the resources needed to properly mitigate risk and manage an organizational security program.

Let Wipfli assist you with your security and privacy challenges. Leverage our realistic, affordable solutions to help your organization:

- Satisfy regulatory compliance
- Manage risk
- Meet business demands
- Gain peace of mind

CYBERSECURITY FOR HEALTH CARE

Service Descriptions

HIPAA Security Risk Assessment

Wipfli assists your organization with completing a HIPAA security risk assessment. This includes a review of your administrative, physical, technical and operational controls and delivers a formal report outlining your risks and recommended corrective actions. You also receive a one-year subscription to the software Wipfli uses to aid in risk-mitigation activities.

Privacy Assessment

Not sure whether you are complying with the HIPAA Privacy Rule requirement? Our experienced health information management professionals perform onsite or remote assessments of your privacy program and provide you with realistic recommendations for improvement and/or compliance.

Policy and Procedure Development

Develop your security and privacy policies and procedures with Wipfli's health care templates. These templates contain best practices and are designed to be easily modified to fit your organization. If you need assistance, Wipfli can help you adapt them to your organization.

Cybersecurity Testing

Wipfli recognizes that security is a moving target, with new risks, threats and vulnerabilities surfacing daily. We bring a profound understanding of the cybersecurity landscape, along with a comprehensive suite of cybersecurity testing services designed to examine the effectiveness of your controls, as well as identify vulnerabilities and deficiencies that could put your organization at risk. These services include:

- Social engineering testing
- Cybersecurity risk scorecard
- Vulnerability scans and assessments
- Penetration tests

Incident Response and Handling

Wipfli's incident response team is there for you 24/7 to help isolate, contain and eradicate incidents should they occur. We'll work swiftly to minimize the impact to your organization and provide forensic investigation support, if needed. A dedicated email address and phone number are provided to your organization to report incidents.

HITRUST Services

Whether you are considering or required to become HITRUST certified, look no further. Wipfli is one of the longest tenured assessor organizations for HITRUST, and we have many years of experience helping organizations plan for and become HITRUST certified. Our team of Certified Common Security Framework Practitioners assists your organization with:

- Gap/Readiness Assessment
- Validated Assessment
- Remediation Assistance/Coordination
- Interim Assessment
- Validated Assessment Client Assistance

Emergency Preparedness

Are you complying with the CMS Emergency Preparedness Rule? Wipfli assists your organization with preparedness, mitigation, continuity and recovery. Our experienced emergency management consultants help you develop or update your Emergency Operation Plan and your Hazard Vulnerability Assessments (HVAs), as well as provide training and exercises tailored to your organization.

Security Advisory and Mentorship

Wipfli security consultants assist your organization with the ongoing development of a formal information security program, as well as mentor and advise your security personnel on the management of the program.

Security Briefings

Quarterly briefing calls cover any questions or issues regarding the security initiatives impacting your organization. Your dedicated security professional answers questions about assessment findings, remediation efforts, new regulatory guidance, and new trends and threats in the security landscape.

More Cybersecurity Services

- Service Organization Controls (SOC) examinations
